

M.S. and Ph.D. Graduate Student Recruitment Forest Operations and Harvesting

The Clemson University Department of Forestry and Natural Resources is offering graduate research assistantships for Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Forest Resource Management with an emphasis in Forest Operations and Harvesting beginning in the 2008 fall semester. These multi-disciplinary programs offer students an opportunity to develop practical skills and academic depth in a variety of areas of specialization including forest fuel reduction, wildfire hazard, biomass utilization, wood supply chain efficiency, harvesting productivity and costs, and wildland/urban interface issues. The research area will depend on the interests of the successful candidates and funding availability. Well-developed oral and written communication skills are desired and the ability to work cooperatively with others is required. Successful candidates will also be required to assist in teaching undergraduate forest operations courses. Tuition will be waived and competitive stipends along with a health insurance subsidy will be provided. M.S. stipends are expected to be \$16,500 per year for 2 years and Ph.D. stipends are \$25,000 per year for 3 years. Graduate assistant fees are currently \$950 per semester. Applicants should possess a B.S. in Forestry, a minimum undergraduate GPA of 3.0, a minimum graduate GPA of 3.5, and minimum GRE scores (Q+V) of 1000.

To apply or seek more information, please send a letter of interest, unofficial transcripts, resume, GRE score, and TOEFL score (if applicable) via email no later than April 1, 2008 to:
